

Xplode Pro+

ADVANTAGES

Xplode Pro+ is designed to be used during seeding and replanting and promotes starting growth for corn, wheat, milo and other seeded crops. Use as a supplement to an existing fertilization program. For best results, apply during planting for optimizing nutrient conditions for seed germination and stronger root establishment. Application can be made directly to the soil or injected.

Xplode Pro+ benefits seedlings when growth of the nodal root system is slowed by weather, impeded by seedbed conditions, or damaged by pests or other factors. It helps reduce and minimize uneven stand development and yield loss that often results from these conditions from early season stress due to weather conditions. Xplode Pro+ may provide the most benefit to growers using no-till or high-residue farming systems.

Works well with an early planting cycle with all soil types like clay, sandy, peaty, chalky, and loamy. Helps with seed germination and roots establishments for healthier growth cycles.

APPLICATION

Agriculture: Use 1 gallon per acre with 3-5 gallons of water. Product can be directly injected into the soil during seeding and replanting.

Soil test must be determined before application. This product may be used on many different crops. Rate information provided is a range and not specific to one crop. Application rates may vary based on type of soil, soil condition, soil testing, climate, and seed type. When mixing with other fertilizer products it is always recommended to perform a jar test to ensure compatibility. For a more specific application rate per acre, please contact your distributor for details.

STORAGE AND HANDLING

Keep the container closed when not in use. Store this product inside at room temperature. 12-14 or more months in the same container kept at a temperature between 45°F-90°F.

FOR INDUSTRIAL OR INSTITUTIONAL USE ONLY
KEEP OUT OF REACH OF CHILDREN
KEEP FROM FREEZING

GUARANTEED ANALYSIS

Total Nitrogen (N)	hardite
1.68% - Ammoniacal Nitrogen	1.73%
0.05% - Urea Nitrogen	
Soluble Potash (K2O)	.47%
Calcium (Ca)	.37%
Magnesium (Mg)	0.08%
Sulfur (S)	.07%
Humic Acid (Derived from Leonardite)	0.56%
Fulvic Acid	0.44%

Derived from: Diammonium Phosphate, Urea, Sulfur Coated Urea, Muriate of Potash, Calcium Carbonate, Magnesium Sulfate, Ammonium Sulfate, Borax, Copper Sulfate, Sodium Molybdate, Iron Citrate, Ferrous Sulfate, Manganese Sulfate, Zinc EDTA Chelating Agent: Ethylenediaminetetraacetic Acid.

ALSO CONTAINS NON PLANT FOOD INGREDIENT(S)

7.8%	Liquid Sugarcanne Extract (Microbe Food)
0.56%	Kelp and Seaweed Extract (Ascophyllum Nodosum)

WEIGHT PERCENTAGE - NANO-ENHANCED

Due to the nature of our Nano-Enhanced and low-salt (sodium) formulations this product may be more effective than other similar products with equally listed components, with their traditional salt-based formulations.

CAUTION

Keep product away from eyes. Do not swallow or ingest this product. It is recommended that safety glasses or other protective eyewear be worn to prevent eye contact. The use of rubber, neoprene, nitrile or other protective gloves is recommended where prolonged or extensive use is expected. Remove contaminated clothing and DO NOT wear it again until thoroughly cleaned. Wash hands thoroughly with soap and water after handling.

FIRST AID

EYES: Immediately flush eyes with plenty of water for at least 15 minutes, occasionally lifting the upper and lower eyelids. Get medical attention if irritation persists.

SKIN: Flush affected area with plenty of water. Consult a physician if irritation develops.

INGESTION: If this product is swallowed do not induce vomiting. If vomiting occurs, keep head below hips to prevent aspiration (breathing) of liquid into the lungs. Get emergency medical attention immediately.
